8. PRIVACY BREACHES

8.1 INTRODUCTION

8.1.1 An information security breach occurs when personal information is exposed to unauthorised access, use, disclosure or modification as a result of a breach of our information security. Information security breaches can occur in a number of ways. Some of the most common information security breaches happen when personal information held by us is lost, misused, mistakenly disclosed or stolen. Some examples include:

- laptops, removable storage devices, or physical files containing personal information becoming lost or stolen
- mistakenly providing personal information to the wrong person, for example by sending details out to the wrong address
- an individual deceiving us into improperly releasing the personal information of another person
- databases containing personal information being 'hacked' into or otherwise illegally accessed by individuals outside of the business and

- employees accessing personal information outside the requirements of their employment.

- 8.1.2 It is important to recognise that information security breaches are not limited to external malicious actions, such as theft or 'hacking', but may just as often involve internal errors and failures to follow established information handling procedures. While there may be no harm intended, these types of security breach can affect individuals' privacy as much as malicious actions.
- 8.1.3 Although a key concern relating to information security breaches is the risk of identity theft or fraud (particularly where credit card information is compromised), the risks from information security breaches are not limited to financial harm—for example, leaks of details about an individual's personal affairs or health information can cause other types of harm such as humiliation, damage to reputation or relationships and loss of business or employment opportunities.

8.2 BREACH RESPONSE

- 8.2.1 In the event that we identify a security information breach we will follow the Privacy Breach Guidelines ([Guide to Handling Personal Information Breaches.pdf](#)) issued by the Privacy Commissioner.

8.3 PRIVACY ACT BREACH PENALTIES

- 8.3.1 Under the Privacy Act, the national privacy regulator, the Office of the Australian Information Commissioner (**OAIC**), has various functions and powers which include:
- 8.3.2 *investigations* - the power to investigate and monitor compliance with the privacy obligations and conduct privacy performance assessments;
- 8.3.3 *enforceable undertakings* - the power to accept enforceable undertakings by APP entities to take, or refrain from taking, specified actions which may be enforced in court if necessary; and
- 8.3.4 *civil penalty orders* - the power to apply to the Federal Court or Federal Circuit Court for a civil penalty order. The Federal Court will have the power to award significant civil penalties for serious or repeated breaches of privacy. Penalties of up to \$1.7 million can apply to body corporates and \$340,000 to APP entities that are not body corporates, including individuals.
